Instructions on updating IntelliGaze

If you have IntelliGaze already installed in your device, please first uninstall it by following these steps:

1. Select **Start**, then select **Settings** > **Apps** > **Apps & features**.
2. Select **IntelliGaze** from the list of Apps, and then select **Uninstall**.

After it is uninstalled, please install the latest IntelliGaze software by following these steps:

1. Go to https://intelligaze.com/en/support/download
2. Click on the file with this name to download the installer:
   IntelliGaze_v5.5.8174_aio_installer.exe
3. When the installer is opened, follow the installation prompts. There are no specific configurations needed, so you can always press "Next" and/or "Accept" until it is installed. If you are unsure of any step, please take a screenshot and we can look into it.
4. Once the installation is complete, a Monitor Calibration window should appear. If it does not appear, we can access it through **Start** > **alea technologies** > **Monitor Calibration**
5. Select **CAM30NT**
6. Select **VESA mount**, which should already be selected automatically
7. Refer to the monitor calibration guide below for the measurements that you need to fill in the calibration details. When done, click **OK**.
8. Now the Alea camera is ready to be used.
