# SL40 LightWRITER – instructions

How to delete words from the SL40 dictionary and prediction list

If a word appears in the prediction list and you wish to remove it you will first need to add it to the dictionary as follows:

Wherever the instruction to SELECT is given – press the DO key.

Open activity bar by pressing "!" key	
Select 6 - setups	
Select 4 – word stores	

|	
Select 5 – dictionary (you will need to have advanced set-ups turned ON to access this)	
Select DO to add new word – add the word you wish to delete; press DO to ENTER word	

Press On/C to clear out of this section	
At the "manage your dictionary" screen, select 5 – dictionary again	
Use the 'next' key to select the letter of the alphabet under which your target word is stored. Press DO to select	
Select DO again	
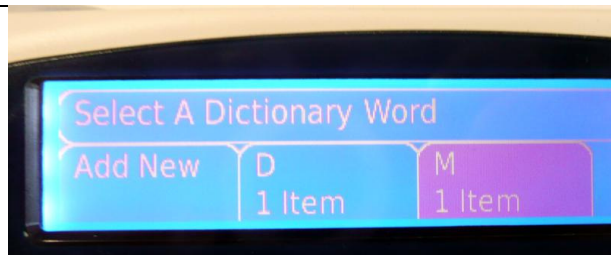

Now you will see the option to DELETE	
Select DO to delete; confirm by pressing DO to select yes.	
Check regular typing and the word will no longer appear in the prediction list.
